

VERSATILE, POWERFUL AND COMFORTABLE

Whether at the construction site or in the salesroom or in the workshop, whether in combination with power tools or for sucking up water: The Ventos 32 is ideal for all cleaning tasks. An automatic start-up, an automatic switchoff in case of the suction of liquids and the large drain plug ensure safe operation. The extra-long power cable and the suction hose offer a large action radius, and a wide range of accessories enables a thorough work.

TECHNICAL HIGHLIGHTS

CONTROL PANEL

For a continuously adjustable suction power, with integrated socket for connecting power tools. The automatic start-up switches the vacuum cleaner on when the tool is switched on, the overrun function ensures the complete draining of the suction hose after switching off the power tool.

PUSH-CLEAN FILTER CLEANING

Simple filter cleaning by pushing a button. By pushing the button on the top of the unit the airflow will be directed through the dust filter to clean it and to restore the full suction power. The dirt falls into the collection container or into the dust bag and can be conveniently disposed of.

PRINCIPLE OF ARRANGEMENT

This means that the accessories are always within reach. Power cable and suction hose can be spooled and stowed easily. A semicircular holder on the top, into which the suction tube can be placed, allows that the Ventos 32 can be carried comfortably by holding the suction tube securely in the recess of the grip.

PRACTICAL DESIGN

The robust and stylish housing is designed so that all important components, such as the dust bag and filter, are within easy reach. The all-terrain chassis also ensures high mobility and stability.

DRAIN PLUG

Thanks to the handy drain plug, liquid collected during wet vacuuming can be emptied simply and easily into a container or the drain. The large container volume of the Ventos 32 L/PC holds up to 30 litres of liquid before it needs to be drained.

WIDE RANGE OF ACCESSORIES

The Ventos 32 L/PC is supplied as standard with a wide range of accessories such as a suction nozzle, floor nozzle, tool adapter, etc.. For further applications, Kränzle has additional equipment for perfect cleaning results.
